PROFESSIONAL SUMMARY

I'm a Staff Frontend Engineer with 12 years building scalable web applications across fintech and e-commerce sectors. I've led frontend architecture decisions that improved performance by up to 40% and mentored teams through major technology migrations. My focus is on writing maintainable code while ensuring teams ship features without burning out, and I genuinely enjoy helping junior engineers grow their skills.

WORK EXPERIENCE

Staff Frontend Engineer

Quantum Fintech Solutions

https://www.quantumfintech.io

Leeds, United Kingdom

March 2021 - Present

Led the migration of legacy AngularJS application to React with TypeScript, reducing bundle size by 35% and improving Core Web Vitals scores across the platform. Established frontend architecture standards and code review practices that are now used across three product teams. Mentored four junior engineers through their progression to mid-level roles, providing weekly 1-1s and hands-on code pairing sessions. Designed and implemented a custom component library that increased feature delivery velocity by 25% and reduced design inconsistencies across products.

Senior Frontend Engineer

BrightCart Technologies

https://www.brightcart.co.uk

Manchester, United Kingdom

August 2017 - February 2021

Built and maintained the checkout experience serving 2 million monthly transactions using React, Redux, and GraphQL, achieving 99.95% uptime. Implemented automated performance monitoring and reduced page load times from 4.2 seconds to 1.8 seconds through code splitting and image optimization. Took ownership of the frontend hiring process, interviewing and onboarding twelve new engineers over three years. Conducted technical workshops on accessibility standards and helped the team achieve WCAG 2.1 AA compliance across all customer-facing pages.

Frontend Engineer

Digital Compass Agency

https://www.digitalcompass.net

Leeds, United Kingdom

June 2012 - July 2017

Developed responsive websites and web applications for 30+ clients using jQuery, HTML5, and CSS3, managing projects from concept through production deployment. Pioneered the adoption of Webpack and ES6 modules within the agency, reducing build times and enabling smoother developer workflows for the entire frontend team. Created a reusable pattern library using Handlebars that standardized components across five concurrent client

projects. Collaborated with UX designers to implement pixel-perfect designs and conducted user testing sessions to validate interaction patterns before final release.

EDUCATION

Bachelor of Science in Computer Science

University of Leeds

Leeds, United Kingdom

Graduated: June 2012

TECHNICAL SKILLS

JavaScript (ES6+), TypeScript, React, Redux, Vue.js, HTML5, CSS3, SCSS, GraphQL, REST APIs, Webpack, Vite, Git, React Testing Library, Jest, Cypress, Web Performance Optimization, Accessibility (WCAG), Figma, Agile/Scrum, Component-Driven Development
