ALEXANDER JAMES MORRISON

Data Scientist, Staff Level

Email: alexander.morrison@gmail.com

Phone: +44 7891 234567

LinkedIn: linkedin.com/in/alexandermorrison

PROFESSIONAL SUMMARY

Experienced data scientist with a decade of hands-on expertise in building machine learning systems and leading analytics initiatives across financial services and tech sectors. I've spent the last five years in senior roles, mentoring junior data scientists while driving complex modelling projects that deliver measurable business impact. Known for translating ambiguous business problems into rigorous statistical frameworks and shipping models that actually work in production. Based in Glasgow with a genuine passion for communicating technical findings to non-technical stakeholders.

WORK EXPERIENCE

Staff Data Scientist

Innovate Analytics Ltd, Glasgow, United Kingdom

www.innovate-analytics.io

January 2022 - Present

Led a team of four data scientists developing predictive models for customer churn and lifetime value across a portfolio of 50+ enterprise clients. Designed and implemented a feature engineering pipeline that processes 2 billion events daily, reducing model training time from 8 hours to 45 minutes. Established coding standards and code review practices that improved model deployment reliability from 82% to 96% first-time success rate. Mentored three junior data scientists through their first production deployments, all of whom have since contributed independently to major initiatives.

Senior Data Scientist

FinTech Solutions plc, Edinburgh, United Kingdom

www.fintechsolutions.co.uk

June 2019 - December 2021

Built fraud detection systems using gradient boosting and neural networks that reduced false positives by 35% while maintaining 99.2% fraud capture rate, saving the company approximately 1.2 million pounds annually. Established the data science team's first MLOps infrastructure using Docker and Kubernetes, enabling model versioning and automated retraining that decreased manual intervention by 70%. Collaborated with the risk and compliance teams to develop interpretable models meeting regulatory requirements, resulting in successful external audit sign-off. Conducted workshops and training sessions with product managers and engineers to embed data literacy across a 120-person organisation.

Data Scientist

Quantum Insights Ltd, Manchester, United Kingdom

www.quantum-insights.net

August 2014 - May 2019

Developed recommendation systems using collaborative filtering and content-based approaches that increased user engagement by 23% and drove 8 million pounds in incremental revenue. Built dashboards and automated reporting systems using Python and SQL that provided real-time insights to executive leadership and reduced reporting time from two weeks to overnight. Conducted statistical analyses and A/B testing on product features, running over 300 experiments that informed product roadmap decisions. Contributed to open-source projects and

published findings at two data science conferences, raising the company's profile in the analytics community.

EDUCATION

Doctor of Philosophy in Machine Learning

University of Edinburgh, Edinburgh, United Kingdom

2010 - 2014

Master of Science in Statistics

University of Glasgow, Glasgow, United Kingdom

2008 - 2010

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Scala, Java

Machine Learning Frameworks: TensorFlow, PyTorch, Scikit-learn, XGBoost, LightGBM, CatBoost

Data Tools: Apache Spark, Pandas, NumPy, Scikit-image, Plotly, Tableau

Database Technologies: PostgreSQL, MongoDB, Cassandra, Redshift, BigQuery

Cloud Platforms: AWS (S3, EC2, SageMaker), Google Cloud Platform, Azure

Version Control and MLOps: Git, Docker, Kubernetes, Jenkins, DVC

Statistical Methods: Bayesian inference, time series analysis, causal inference, experimental design, hypothesis testing

Domain Knowledge: Financial services, fraud detection, customer analytics, recommendation systems, natural language processing

PROFESSIONAL MEMBERSHIPS

Royal Statistical Society, Member since 2015
