PROFESSIONAL SUMMARY

I'm a junior data analyst with two years of hands-on experience transforming raw data into actionable insights for business teams. I have a strong foundation in SQL and Python, with practical experience building dashboards and creating reports that help stakeholders make informed decisions. I'm curious about data patterns and enjoy working through complex datasets to find the story they're telling. I'm looking for opportunities to deepen my analytical skills while contributing to meaningful projects.

WORK EXPERIENCE

Data Analyst

DataViz Solutions Ltd

www.dataviz-solutions.io

Birmingham, United Kingdom

September 2022 - Present

Developed and maintained 12 interactive dashboards in Tableau that track key business metrics for C-suite stakeholders, reducing report generation time by 60 percent.

Wrote SQL queries to extract and clean data from multiple sources, improving data accuracy from 94 percent to 99.2 percent across three departments.

Collaborated with marketing and sales teams to identify customer trends, resulting in targeted campaign recommendations that increased conversion rates by 8 percent.

Documented data processes and created user guides to enable non-technical team members to access and interpret reports independently.

Junior Data Analyst

Insight Analytics Group

www.insightanalytics.co

Coventry, United Kingdom

March 2022 - August 2022

Analyzed customer purchasing patterns using Python pandas library, identifying seasonal trends that informed inventory planning decisions.

Created weekly performance reports for operations management, highlighting KPI variances and providing root cause analysis for underperforming metrics.

Assisted senior analyst in building an automated data pipeline that reduced manual reporting hours from 12 per week to 3 per week.

Participated in data quality audits and flagged discrepancies in source systems, contributing to improved upstream data governance.

Data Support Analyst

Birmingham Business Solutions

www.birminghambs.net

Birmingham, United Kingdom

June 2021 - February 2022

Extracted data from company CRM system and created pivot tables to support business decision-making for regional managers.

Assisted in preparing ad-hoc reports for stakeholders within 24-hour turnaround times, maintaining 100 percent delivery accuracy.

Performed data validation checks on customer records and resolved 47 data integrity issues across the system.

Provided frontline support to end-users experiencing issues with reporting tools and dashboard access.
