PROFESSIONAL SUMMARY

I'm a DevOps engineer with 8 years of experience designing and maintaining cloud infrastructure for high-traffic applications. I've spent the last four years at a fintech startup where I built our entire Kubernetes ecosystem from scratch and reduced deployment times by 70 percent. I have a strong background in infrastructure automation, container orchestration, and cloud platform administration. I enjoy solving complex system problems and mentoring junior engineers on best practices.

WORK EXPERIENCE

Senior DevOps Engineer

Vertex Systems | vertexsys.io

Cambridge, United Kingdom

January 2022 - Present

Architected and implemented a multi-region Kubernetes cluster serving 50+ microservices with zero-downtime deployments and 99.98% uptime SLA

Designed infrastructure-as-code solutions using Terraform and Helm that reduced manual configuration by 85% and enabled self-service deployments for development teams

Implemented comprehensive monitoring and alerting using Prometheus, Grafana, and PagerDuty, reducing mean time to detection from 45 minutes to 8 minutes

Led security hardening initiatives including implementation of network policies, secrets management, and container image scanning, achieving SOC2 Type II compliance

DevOps Engineer (Mid-Level)

Fintech Innovations Ltd | www.fintechinnovations.com

Cambridge, United Kingdom

March 2019 - December 2021

Built and maintained a Kubernetes platform from greenfield, migrating 40+ applications from EC2 instances and reducing infrastructure costs by 60%

Established CI/CD pipelines using GitLab CI and Jenkins, enabling 200+ deployments per day with automated testing and security scanning

Implemented centralized logging solution using ELK stack, processing 500GB+ logs daily and improving incident investigation time

Mentored three junior engineers on cloud technologies and DevOps practices, with two promoted internally within the team

Systems Administrator

Clearwater Technology Group | clearwater.co.net

London, United Kingdom

June 2016 - February 2019

Managed on-premises infrastructure supporting 300+ employees across multiple office locations using VMware vSphere and Hyper-V

Implemented backup and disaster recovery strategies using Veeam, achieving RPO of 4 hours and RTO of 30 minutes for critical systems

Automated routine maintenance tasks using Bash and PowerShell scripts, eliminating 15+ manual processes and reducing operational overhead

Coordinated cloud migration project moving 25 physical servers to AWS, selecting appropriate instance types and optimizing for cost and performance

EDUCATION

Bachelor of Science in Computer Science

University of Cambridge

Cambridge, United Kingdom

Graduated 2016

TECHNICAL SKILLS

Cloud Platforms: AWS, Google Cloud Platform, Microsoft Azure

Container and Orchestration: Docker, Kubernetes, Helm, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD: GitLab CI, Jenkins, GitHub Actions, CircleCI

Programming and Scripting: Python, Bash, Go, PowerShell

Monitoring and Logging: Prometheus, Grafana, ELK Stack, Datadog

Databases: PostgreSQL, MySQL, Redis, MongoDB

Networking: VPC configuration, load balancing, DNS, SSL/TLS

CERTIFICATIONS

Certified Kubernetes Administrator (CKA)

AWS Certified Solutions Architect Professional

HashiCorp Certified: Terraform Associate

GITHUB REPOSITORIES

github.com/jrichardson-devops/kubernetes-terraform-aws

Terraform modules for automated Kubernetes cluster provisioning on AWS with best practices for networking and security.

github.com/jrichardson-devops/prometheus-monitoring-stack

Production-ready Prometheus and Grafana stack with custom dashboards for Kubernetes monitoring and alerting rules.

github.com/jrichardson-devops/cicd-pipeline-templates

Reusable GitLab CI pipeline templates for common deployment patterns including canary releases and blue-green deployments.

github.com/jrichardson-devops/infrastructure-automation-scripts

Collection of Python and Bash scripts for common infrastructure automation tasks including backup management and cost optimization.
