PROFESSIONAL SUMMARY

Results-driven Senior Data Analyst with seven years of experience transforming complex datasets into actionable business insights. Specialised in developing automated reporting systems and leading cross-functional analytics projects that have driven significant cost savings and revenue growth. Known for combining strong technical skills with the ability to communicate findings clearly to non-technical stakeholders. Seeking opportunities to mentor junior analysts while continuing to push the boundaries of what data can reveal about business performance.

WORK EXPERIENCE

Senior Data Analyst

Velocity Analytics Ltd

www.velocityanalytics.io

Edinburgh, United Kingdom

March 2021 - Present

Designed and implemented a centralised data warehouse serving 15+ departments, reducing report generation time by 68% and enabling real-time business monitoring.

Led a team of two junior analysts in developing Python scripts to automate routine ETL processes, saving approximately 200 hours of manual work annually.

Conducted advanced statistical analysis on customer behaviour patterns, identifying three new revenue opportunities that generated an estimated 350k in additional annual income.

Created interactive Power BI dashboards tracking key performance indicators for executive leadership, presenting monthly insights to C-level stakeholders.

Data Analyst

Thomson Financial Services

www.thomson-fs.co.uk

Edinburgh, United Kingdom

July 2018 - February 2021

Built and maintained SQL databases containing historical transaction data, ensuring data integrity across 2.5 million customer records used by risk and compliance teams.

Developed daily automated reports in Excel and Tableau, used by portfolio managers to track fund performance against benchmarks and manage client communications.

Analysed customer churn patterns using logistic regression modelling, revealing that 85% of at-risk customers had specific engagement triggers, leading to targeted retention campaigns.

Collaborated with IT and business teams to migrate legacy reporting systems to cloud-based solutions, improving system reliability and reducing infrastructure costs by 40%.

Data Analyst

Horizon Market Research

www.horizonresearch.net

Glasgow, United Kingdom

September 2016 - June 2018

Processed and cleaned survey data from 50,000+ respondents quarterly, identifying data quality issues and implementing validation procedures that reduced errors by 55%.

Created statistical summaries and trend analysis reports for 20+ client accounts across retail, telecommunications, and financial services sectors.

Supported the development of predictive models to forecast consumer demand, with validation accuracy improving from 72% to 88% following recommendations for feature engineering.

Trained five new team members on SQL basics and report writing, establishing documentation standards that became company best practice.

EDUCATION
