PROFESSIONAL SUMMARY

Forward Deployed Engineer with 3 years of hands-on experience deploying and maintaining infrastructure across distributed teams. Skilled at troubleshooting production issues under pressure and working directly with customers in field environments. I've spent time embedded with teams managing cloud deployments and on-premises systems, getting comfortable with both the technical and interpersonal side of supporting critical infrastructure.

WORK EXPERIENCE

Field Infrastructure Engineer

TechDeploy Solutions

techdeploysolutions.io

London, United Kingdom

June 2022 - Present

Deployed and configured Kubernetes clusters across multiple customer environments, working directly with their technical teams to ensure smooth migrations from legacy systems

Managed on-site support rotations for 12 enterprise clients running containerised applications, responding to critical incidents with average resolution time of 2 hours

Automated infrastructure provisioning using Terraform and Ansible, reducing deployment time by 45% and eliminating manual configuration errors

Built comprehensive runbooks and disaster recovery documentation for each client deployment, resulting in reduced escalation calls by 60%

Systems Operations Technician

CloudFirst Networks

cloudfirst.co

Edinburgh, United Kingdom

March 2021 - May 2022

Monitored and maintained AWS infrastructure supporting 8 SaaS applications with combined 99.95% uptime, using CloudWatch and custom Python monitoring scripts

Troubleshot network connectivity issues across hybrid cloud environments, reducing mean time to resolution from 4 hours to 45 minutes

Implemented automated backup and recovery processes using AWS Lambda and S3, ensuring all critical data had tested restore points

Coordinated with development teams during deployments, managing rollback procedures and post-incident reviews

Junior Systems Administrator

Granite IT Services

graniteit.net

Glasgow, United Kingdom

August 2019 - February 2021

Provisioned and patched 200+ Linux and Windows servers using configuration management tools, maintaining 98% compliance with security baselines

Provided first and second-line technical support to internal teams and managed service clients, maintaining ticket resolution rate of 92%

Documented system architectures and runbooks for knowledge transfer, creating 15+ detailed guides still in use by the support team

Assisted with data centre migrations and hardware refreshes, coordinating with vendors to minimize downtime during critical transitions

EDUCATION

BSc Computer Science

University of Glasgow

Glasgow, United Kingdom

Graduated June 2019

TECHNICAL SKILLS

Cloud Platforms: AWS EC2, S3, Lambda, RDS, VPC, CloudWatch

Container Orchestration: Kubernetes, Docker, Docker Compose

Infrastructure as Code: Terraform, CloudFormation, Ansible

Scripting Languages: Python, Bash, PowerShell

Monitoring and Logging: ELK Stack, Prometheus, Grafana, DataDog

Databases: PostgreSQL, MySQL, MongoDB

Version Control: Git, GitHub

Networking: TCP/IP, DNS, VPN, Load Balancing

Operating Systems: Linux RHEL/Ubuntu, Windows Server 2016-2022
